Healthcare Workload Layer
Containerized Healthcare Application Environment
co-located agent monitors workload
all four agents monitor E and F
Workload A
Workload B
Workload C
Workload D
Workload E
Workload F
Distributed Security Agent and Decision Layer
Agent A
Agent B
Agent C
Agent D
Workload Monitoring
Rule-Based Detection
Evidence Generation
Ed25519 Signing
Local Trust Assessment
Peer-to-peer gRPC + mTLS links between all agents
Ed25519-signed evidence, votes and certificate shares
Observer-Specific Trust Management
Trust-Weighted Evidence Correlation
Three-of-Four Quorum Authorization
3-of-4 Application-Level Authorization
Independent local trust and decision state at each agent
authorized protective action
Containment and Recovery Layer
Forensic Snapshot Initiation
Kubernetes NetworkPolicy Isolation
Known-Good Container Image Replacement
Recovery Validation
Controlled Workload Reintegration
started concurrently
Recovered workload re-enters the application environment
