Demo Mode: Overview (healthcare names, Services panel, demo controls)

Security alert: grouped evidence, actions, who agreed (part 1/2)

DEMO MODE — SIMULATED DATA. No real healthcare workload is being attacked.

✔ Demo Mode | Live Monitoring | SYNTHETIC DATA ONLY: no real patient information | Simulated data only · no real healthcare workload is attacked

Distributed Cyber-Resilience Platform

mode: distributed · data from 10:24:15 AM

decision logs ✔ intact (4 agents) | Auto-refresh on | Pause | Export events

Overview | Security Alerts | Investigate | Recovery | Performance Results | Activity Log

← All security alerts | C Electronic Health Records (EHR) API · security alert #1 | SIMULATOR | ✔ RESOLVED

isolated at 10:23:53 AM · events from 10:21:53 AM until now · Built from what the dashboard has seen since it started polling; events older than the agents' rings at that moment are not available.

Where it stands now

Status **Healthy**, access **Normal Access Restored**, recovery attempt **1**. A Healthy / Normal Access Restored · B Healthy / Normal Access Restored · C Healthy / Normal Access Restored · D Healthy / Normal Access Restored

Finished: nothing is pending.

What triggered it

Agents A, B, C, D signed votes to isolate records-api (C); the evidence they cited is listed per agent. Seen by A B C D.

from agent	signal	latest reading	readings	
A	Network Activity	40 outbound conns, tx 1954 KiB/s	2	▸ all 2 different readings
A	Running Processes	unexpected processes: xmrig	2	▸ all 1 different reading
A	File Changes	1 modified file(s): static/index.html	2	▸ all 1 different reading
A	Failed Logins	15 failed auths from 10.244.0.12 in 10s	1	▸ all 1 different reading
D	Network Activity	40 outbound conns, tx 1954 KiB/s	2	▸ all 2 different readings
D	Running Processes	unexpected processes: xmrig	2	▸ all 1 different reading
D	File Changes	1 modified file(s): static/index.html	2	▸ all 1 different reading
D	Failed Logins	15 failed auths from 10.244.0.12 in 10s	1	▸ all 1 different reading
B	Network Activity	40 outbound conns, tx 1954 KiB/s	2	▸ all 2 different readings
B	Running Processes	unexpected processes: xmrig	2	▸ all 1 different reading
B	File Changes	1 modified file(s): static/index.html	2	▸ all 1 different reading
B	Failed Logins	15 failed auths from 10.244.0.12 in 10s	1	▸ all 1 different reading
C	Running Processes	unexpected processes: xmrig	2	▸ all 1 different reading
C	Network Activity	40 outbound conns, tx 1954 KiB/s	2	▸ all 2 different readings
C	File Changes	1 modified file(s): static/index.html	2	▸ all 1 different reading
C	Failed Logins	15 failed auths from 10.244.0.12 in 10s	1	▸ all 1 different reading

▸ Technical details

Actions: proposed → agreed → attempted → verified

Proposed — agents signed votes for it

Agreed (3 of 4) — at least 3 of the 4 agents signed ⓘ; recorded in the tamper-evident decision log

Attempted — an agent really called the Kubernetes API (more than one only if the first failed or timed out)

Verified — the cluster was READ afterwards and shows the effect; ? = a timeout whose result could not be read

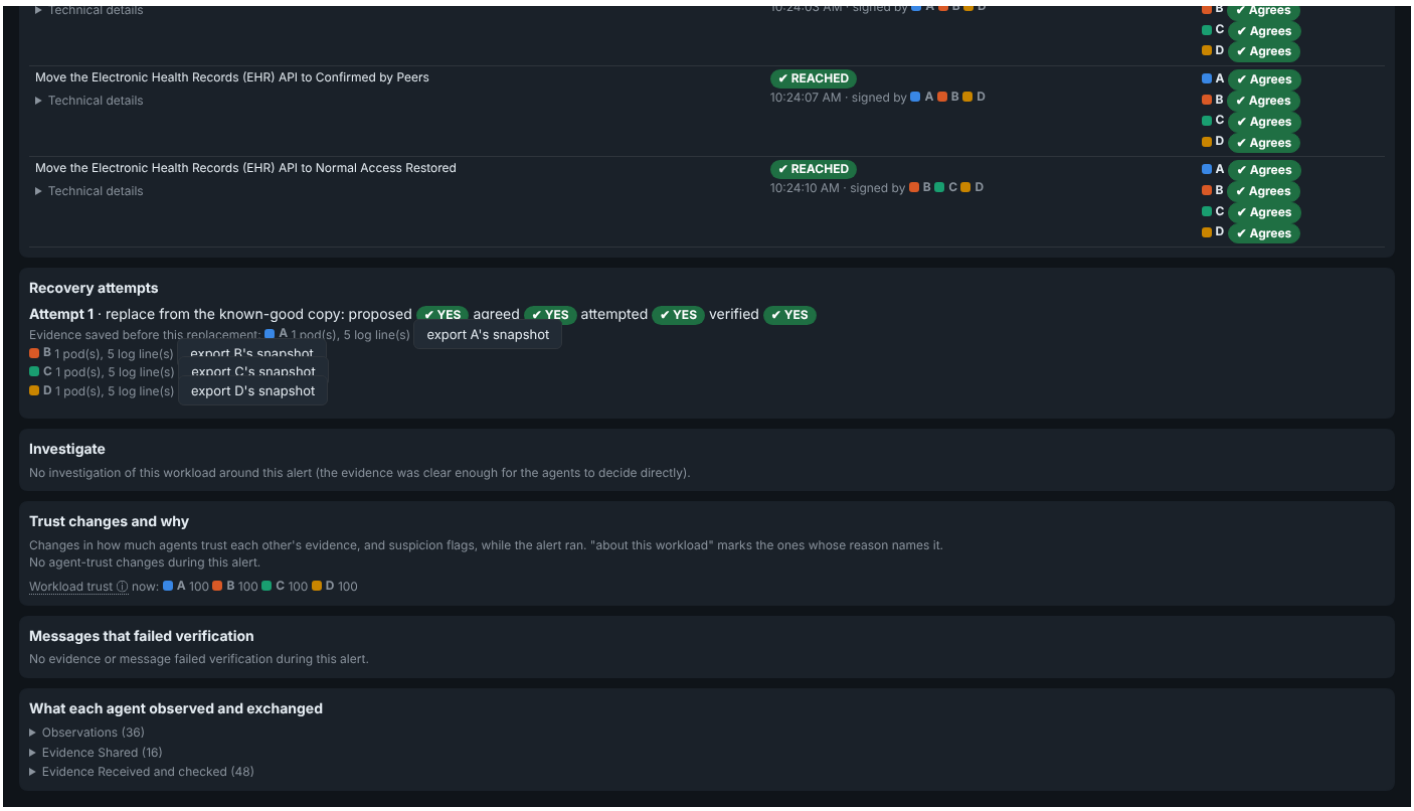

action	Proposed	Agreed (3 of 4)	Attempted	Verified
Isolation: block the workload's network access ▸ 4 record(s) · skipped 1 (already done by another agent) ▸ Technical details	✔ YES A B C D	✔ YES A B C D 10:23:53 AM	✔ YES A	✔ YES A B C 10:23:54 AM
Replace it from the known-good copy (attempt 1) ▸ 4 record(s) · skipped 1 (already done by another agent) ▸ Technical details	✔ YES A B C D	✔ YES A B C D 10:23:53 AM	✔ YES A	✔ YES A B C 10:23:54 AM
Recovery Check passed: record it in the cluster ▸ 4 record(s) ▸ Technical details	✔ YES A B C D	✔ YES A B C D 10:23:56 AM	✔ YES A	✔ YES A B C D 10:23:57 AM
Access step: Limited Access ▸ 4 record(s) ▸ Technical details	✔ YES D A B C	✔ YES A B D 10:24:00 AM	✔ YES A	✔ YES A B C D 10:24:00 AM
Access step: Monitored Access ▸ 4 record(s) ▸ Technical details	✔ YES B A C D	✔ YES A B D 10:24:03 AM	✔ YES A	✔ YES A B C D 10:24:04 AM
Access step: Confirmed by Peers ▸ 4 record(s) ▸ Technical details	✔ YES D A B C	✔ YES A B D 10:24:07 AM	✔ YES A	✔ YES A B C D 10:24:07 AM
Access step: Normal Access Restored ▸ 4 record(s) ▸ Technical details	✔ YES B C D A	✔ YES B C D 10:24:10 AM	✔ YES A	✔ YES A B C D 10:24:10 AM

Who agreed

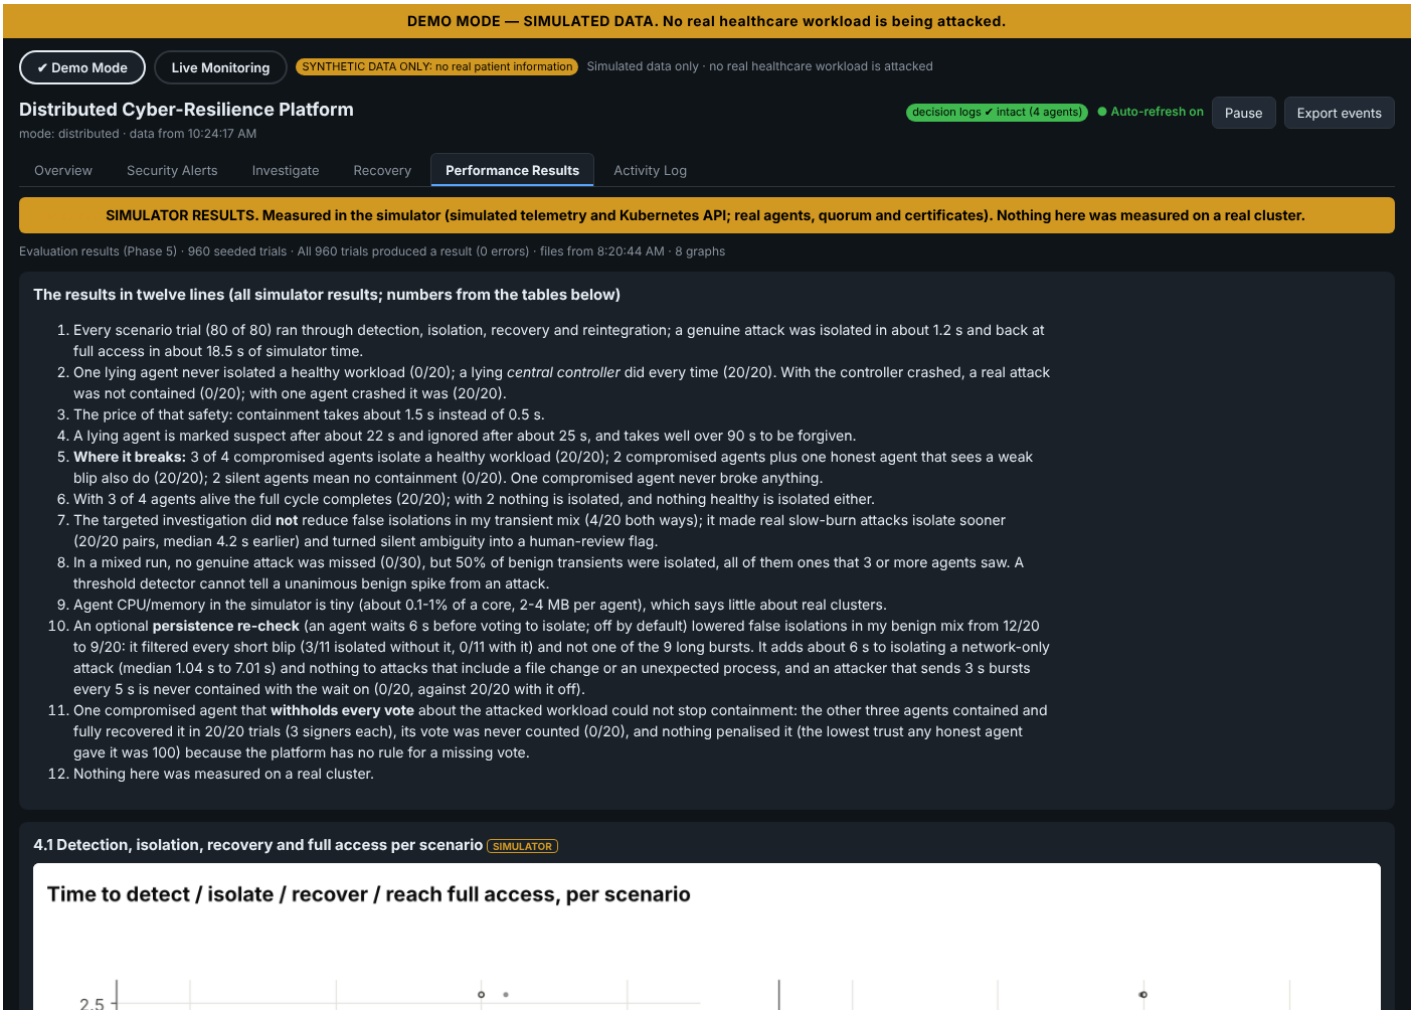

Each agent is in exactly one state. **A missing vote is never approval:** only a signed vote that was counted is "Agrees".

what	Agreement Reached (3 of 4)?	each agent
Isolate the Electronic Health Records (EHR) API ▸ Technical details	✔ REACHED 10:23:53 AM · signed by A B C D	A ✔ Agrees B ✔ Agrees C ✔ Agrees D ✔ Agrees
Accept the Electronic Health Records (EHR) API after its Recovery Check ▸ Technical details	✔ REACHED 10:23:56 AM · signed by A B C D	A ✔ Agrees B ✔ Agrees C ✔ Agrees D ✔ Agrees
Move the Electronic Health Records (EHR) API to Limited Access ▸ Technical details	✔ REACHED 10:24:00 AM · signed by A B D	A ✔ Agrees B ✔ Agrees C ✔ Agrees D ✔ Agrees
Move the Electronic Health Records (EHR) API to Monitored Access	✔ REACHED	A ✔ Agrees
